

Hydrogeologist Technician Position

Zara Environmental LLC is located in Manchaca, Texas, on the Balcones Fault Zone near the heart of central Texas' expansive Edwards Aquifer. Opportunities for studying and becoming involved in karst conservation and groundwater issues are abundant. Zara is seeking a technician to work under a hydrogeologist assisting with geological assessments and cave investigations. Duties will include field surveys, excavations, data entry, and miscellaneous office tasks as needed to support geology and sometimes biology related work.

Applicants should have the following qualifications:

1. A BS in geology or closely related degree. Experience could substitute for a degree.
2. Excellent computer skills, GIS experience a plus.
3. Ability to work independently.
4. Willingness to work in the field and specifically in caves, with some travel out of town.

Additionally the following skills will be considered a plus:

5. Experience with karst investigations (cartography, excavation, vertical capability).
6. Writing and research skills.

Salary will be commensurate with experience and qualifications, the range is \$24,000 - \$32,000.

Competitive benefits package including full coverage of basic health and dental insurance and retirement savings plan.

Please send cover letter and resume to: marcus@zaraenvironmental.com prior to 21 February 2010.
